

Safety, Effectiveness, Convenience

## WHY MONICA VIP ?

### Safety

- 1 Natural high-purity hyaluronic acid (HA), increasing sustainability and maintaining safety.
- 2 Proven biocompatibility in EDQM (European Directorate for the Quality of Medicines & Healthcare).
- 3 Impurity removal through elevated separation purification and dialysis processes (BDOE cross-linker, heavy metals & endotoxin).
- 4 Safe manufacturing process (Minimizing the risk of microbial contamination via the post-sterilization process).

### Effectiveness

- 1 The physical advantages of high cross-linked HA.
- 2 The physiological characteristics of natural high-purity HA.
- 3 Excellent elasticity & Optimum volume.
- 4 Excellent shape retention and sustainability after the procedure.
- 5 Immediate effect after procedure.
- 6 Pain relief with comfortable and soft injection.

### Convenience

- 1 Integral syringe: Usability that it is easy to handle.
- 2 **Product Line-Up:**
  - MONICA VIP GLB (Fine)
  - MONICA VIP GLC (Deep)
  - MONICA VIP GLS (Voluma)

## MONICA VIP GLB (Fine)

Safety, Effectiveness, Convenience

- 1 The key to effective filler for volume, contour and wrinkle improvement is elasticity and sustainability.
- 2 MONICA VIP GLB uses high concentrations of HA to provide high elasticity, and increase enzyme resistance to ensure long lasting effects.
- 3 In addition, all products contain lidocaine to relieve pain during the procedure and eliminate the need for a recovery period from scars and swelling.

- 1 Hyaluronic acid particle size : small size
- 2 Treatment area : lacrimal groove (bear trough), smile lines, lip lines
- 3 Effect : Effective for removing skin wrinkles and improving the signs of aging.
- 4 Net weight : 1.0ml / Syringe
- 5 Composition : Cross-linked Hyaluronic Acid + Lidocaine
- 6 Size : W 190mm X D 70mm X H 30mm

## MONICA VIP GLC (Deep)

Safety, Effectiveness, Convenience

- 1 The key to effective filler for volume, contour and wrinkle improvement is elasticity and sustainability.
- 2 MONICA VIP GLC uses high concentrations of HA to provide high elasticity, and increase enzyme resistance to ensure long lasting effects.
- 3 In addition, all products contain lidocaine to relieve pain during the procedure and eliminate the need for a recovery period from scars and swelling.

- 1 Hyaluronic acid particle size : medium size
- 2 Treatment area : glabella(the space between the eyebrows), forehead, temple, lip lines, cheek, smile lines, bridge of the nose
- 3 Effect : Effective for improving thick wrinkles and restoring facial volume.
- 4 Net weight : 1.0ml / Syringe
- 5 Composition : Cross-linked Hyaluronic Acid + Lidocaine
- 6 Size : W 190mm X D 70mm X H 30mm

## MONICA VIP GLS (Voluma)

Safety, Effectiveness, Convenience

- 1 The key to effective filler for volume, contour and wrinkle improvement is elasticity and sustainability.
- 2 MONICA VIP GLS uses high concentrations of HA to provide high elasticity, and increase enzyme resistance to ensure long lasting effects.
- 3 In addition, all products contain lidocaine to relieve pain during the procedure and eliminate the need for a recovery period from scars and swelling.

- 1 Hyaluronic acid particle size : Biggest Particles + Small Particles stereoscopic composition
- 2 Treatment area : front crown, crown, nose, chin
- 3 Effect : Effective for increasing volume production in deep, thick wrinkles and thick skin layers.
- 4 Net weight : 1.0ml / Syringe
- 5 Composition : Cross-linked Hyaluronic Acid + Lidocaine
- 6 Size : W 190mm X D 70mm X H 30mm

MONICA VIP offers safe and effective products for a variety of application area

- MONICA VIP GLB with Lidocaine
- MONICA VIP GLC with Lidocaine
- MONICA VIP GLS with Lidocaine

- Area between the eyebrows
- Bridge of the nose
- Nose
- Smile lines
- Lips
- Lip lines

- Forehead
